IMTIAZ SHAIK

DevOps Engineer

imtiaz6750@gmail.com | 732-334-8294 | www.linkedin.com/in/imtiazshaik-devops

PROFESSIONAL SUMMARY:

- ✓ Overall **7 years** of experience in IT industry comprising of Development, Systems Administration and Software Configuration Management (SCM). Extensive experience includes Azure, Build/Release Management.
- ✓ Experience as a **Microsoft Azure DevOps Engineer** in various Cloud service models, including **IaaS, PaaS, and SaaS** and supporting deployment models, including Private, Public, and Hybrid cloud.
- ✓ Experience in creating work items, Sprints, user stories, tickets on **Azure Boards** to track the work items across the working projects.
- ✓ Experienced in **Configuring and Deploying** infrastructure and applications into cloud using **AWS resources such as EC2 instances, S3, RDS, EBS, VPC, SNS, IAM policies, Route 53, Auto scaling, Cloud Front, Cloud Watch, Cloud Trail, Cloud Formation, OpsWork, Security Groups** focusing on fault tolerance and high availability.
- ✓ Utilized AWS Cloud watch to monitor environment for operational & performance metrics during load testing.
- ✓ Efficient in writing **Jenkins Pipeline** groovy Scripts for Continuous Integration and build workflows and using Jenkins uploading **Artifacts into Nexus** Repository.
- ✓ Experience in continuous integration technologies **Jenkins** and Cloud bees Jenkins, Designed and created multiple deployment strategies using **Continuous Integration and Continuous Development Pipelines** and configuration management tools with remote execution to ensure zero downtime and shortened deployment cycles via automated deployments.
- ✓ Experience in writing Infrastructure as Code using **Terraform**.
- ✓ Automated various day-to-day administration task by developing **Bash, Ruby, JSON, Perl, PowerShell, and Python Scripts**.
- ✓ Hands on experience in creating **Docker** images using a Docker file. Worked on **Docker container**, removing images and managing docker volumes.
- ✓ Hands on experience with **Azure container registry**, **Azure Kubernetes** services in deploying the **Kubernetes clusters** and pods management.
- ✓ Hands on Experience working on **Function apps, Service Bus, Subscription, Topic, Queue** for **Serverless applications** deployment to monitor and check logs.
- ✓ Experience in creating Azure **Key vaults** to maintain the secrets in code.
- ✓ Extensive hands-on work experience classic pipelines and **YAML** pipelines for build and release pipelines for multiple projects and Knowledge on **python** & **SQL DB**, **Cosmos DB**.
- ✓ Good hands-on work experience with **Kubernetes AKS** deployments and created clusters, pods for the **QA** and DEV, prod deployment pipelines.
- ✓ Hands on experience in providing Access to users and groups across the projects.
- ✓ Extensive knowledge on **Agile methodologies** and project life cycle with **Azure DevOps.**
- ✓ Hand on experience working with CI/CD pipelines and **branching strategies, branching policies and deployment strategies**.
- ✓ Knowledge on **AWS** Cloud and DevOps tools, **Jenkins, Gradle, Maven, Grafana, new relic, Ms Build, NPM, Jfrog**.
- ✓ Experienced in troubleshooting, configuring and deploying Enterprise Web Application servers like **Apache Tomcat, Nginx** and **Ingress**.
- ✓ Experience with working on multi-platform servers using **NAGIOS** tool, utilized this tool to configure and monitor.
- ✓ Having extensive experience with Kick Start Server and Jump Start Server to install operating systems on multiple machines simultaneously.

TECHNICAL SKILLS:

Operating Systems	Linux, Ubuntu, Windows
Language/Scripts	Azure CLI, Power shell, Bash, Python, YAML, HTML, CSS, JavaScript, Bootstrap and WordPress
Version Control System (SCM)	GIT, GIT HUB and Bitbucket
Management/Build Tools	Maven, Ansible, Docker, MS build, Gradle

Continuous Integration Tool	Azure Pipelines, Jenkins
Containerization & Container orchestration (Micro Services)	Docker, Kubernetes and EKS
Cloud Technologies:	Azure, AWS
Application & Web Servers	Nginx
Issue Tracking Tools	JIRA, Confluence, Rally
Logging & Monitoring Tools	Splunk, CloudWatch, ELK, Dynatrace, Nagios, Azure Insights
Database	MySQL, PostgreSQL, Dynamo DB
Infrastructure as Code	Terraform, ARM templates

CERTIFICATIONS:

- ✓ Microsoft Azure Fundamentals: AZ-900
- ✓ Microsoft Certified: Azure Administrator Associate: AZ-104
- ✓ Microsoft Azure DevOps: AZ-400
- ✓ AWS Cloud Practioner-CCP-Clf02
- ✓ HashiCorp Cloud Engineer certification-HCTAO-003
- ✓ Microsoft Azure AI Fundamentals - AI-900

PROFESSIONAL EXPERIENCE

DevOps Engineer **Park National Bank**

Newark, OH *Oct/2024 - Till Date*

- ✓ Designed and implemented Infrastructure as Code (IaC) using Terraform to provision and manage **AWS** resources including **EC2, VPC, ALB, Auto Scaling, IAM, S3** and **RDS**, ensuring consistent, repeatable and auditable deployments across environments.
- ✓ Automated configuration management and application provisioning using Ansible, developing reusable **playbooks** and roles for OS hardening, package installation, application deployments and environment standardization.
- ✓ Built and maintained end-to-end **CI/CD** pipelines using **Jenkins, Maven** and **Git**, enabling automated build, test and deployment workflows and reducing manual deployment effort by 80%.
- ✓ Developed **Python automation scripts** integrated with **AWS APIs (boto3)** to manage **EC2** lifecycle operations, health checks, scaling actions and operational tasks.
- ✓ Implemented automated **testing frameworks (robustness, longevity** and **load** testing) integrated into **Jenkins pipelines**, improving release stability and early defect detection.
- ✓ Automated inbound and outbound service deployments using Terraform and Ansible, enabling parallel provisioning of multiple **AWS** resources with minimal human intervention.
- ✓ Led cloud infrastructure monitoring and optimization on **AWS**, improving system reliability, availability and scalability through proactive alerting and performance tuning.
- ✓ Reduced build and deployment failures by 95% by identifying infrastructure bottlenecks, standardizing environments with Ansible, and improving pipeline reliability.
- ✓ Established code review and release governance processes, ensuring compliance with **Agile** best practices and improving collaboration between development and operations teams.
- ✓ Implemented Software Release Management strategies aligned with **Agile/Scrum** methodologies, supporting frequent, reliable and traceable releases.
- ✓ Authored and maintained release documentation, configuration standards and deployment runbooks, improving onboarding efficiency and operational clarity.
- ✓ Used **Maven** for dependency management and build automation; supported dynamic and snapshot versioning for development and release workflows.
- ✓ Managed **Git** version control with effective branching, tagging and release strategies, supporting **CI/CD** automation and rollback capabilities.
- ✓ Configured and customized **JIRA** for defect tracking, workflows, dashboards and reporting to improve visibility into release readiness and sprint progress.

Environment: AWS, Amazon EC2, Amazon S3, Amazon RDS, Amazon VPC, Auto Scaling, Elastic Load Balancer (ALB), Amazon EKS, Docker, Kubernetes, Terraform, Ansible, AWS CLI, AWS Lambda, Jenkins, Maven, CloudFormation, Python, REST/HTTP, JSON, Git, Jira, Agile/Scrum, Linux, Windows

DevOps Engineer **EagleBank**

Bethesda, MD *01/2023 - Sep/2024*

- ✓ Designed and configured **Azure Virtual Networks (VNets),** subnets, **Azure network settings**, DHCP address blocks, DNS settings, security policies and routing.
- ✓ Moved services from on premises to **Azure Cloud Environments**. Using **Azure Portal and PowerShell scripts, Azure Security groups** were managed and linked to VMs and subnets.
- ✓ Worked with **Terraform** Templates to automate the **Azure IaaS virtual machines** using terraform modules and deployed virtual machine scale sets in production environment.
- ✓ Creating **ARM templates** for Azure platform and in migrating on premise to Windows Azure using Azure Site Recovery and Azure backups and created and configured **HTTP** Triggers in the **Azure Functions** with Application insights for monitoring and performing load testing on the applications using the **VSTS.**
- ✓ Installed and Configured the **Ansible Configuration Management** Tool for managing **Web applications, Environments configuration Files, Users, Mount points, Packages**. Used the **Ansible Vault** to secure the credentials used during deployments.
- ✓ Responsible for Configuring **Kafka** Consumer and Producer metrics to visualize the Kafka System performance and monitoring
- ✓ Used **Jenkins** pipelines to drive all micro services builds out to the **Docker** registry and then deployed to **Kubernetes,** Created Pods and managed using **Kubernetes**
- ✓ Witten Terraform and Arm templates for creating of all the PaaS resources.
- ✓ Worked on Serverless services, created and configured **HTTP Triggers** in the Azure Functions with application insights for monitoring and performing load testing on the applications using the **Visual Studio Team Services (VSTS)** also called as **Azure DevOps Services.**
- ✓ Provided status to Business Level management and Technical and conducting Proof of Concept for Latest Azure cloud-based service
- ✓ Developed build using **MAVEN** as tools and used CI tools to kick off the builds to move from one environment to other environments.
- ✓ Involved in **Jira** as defect **tracking** system and configure various workflows, customizations, and **plugins** for **Jira bug/issue tracker** integrated **Jenkins** with **Jira**, **GitHub**.
- ✓ Troubleshooting issues relate App services (webapp and Function apps), Logic apps, APIM, ASE and ADO, AAD and Identity issues etc.

Environment: Azure, Azure Kubernetes Service (AKS), Docker, Ansible, Azure CLI, Azure Functions, Jenkins, Kubernetes, PowerShell, Maven, Kubernetes, Terraform, WebSphere, HTTP, VSTS, JSON, Jira, Agile, Windows

DevOps Engineer **World Insurance Associates**

Iselin, NJ *10/2020 - 12/2022*

- ✓ Automated the provisioning, scaling, and updates of virtual machines using Azure Automation and Ansible.
- ✓ Created Docker images using a **Docker file,** worked on **Docker** container snapshots, removing images and managing **Docker volumes.**
- ✓ Created **Ansible Playbooks** for various environments for release and rewrite **puppet** modules into the Ansible Playbooks.
- ✓ Deploying windows **Kubernetes (K8s)** cluster with **Azure Container Service (ACS)** from **Azure CLI** and utilized **Kubernetes** and **Docker** for the runtime environment of the **CI/CD** system to **build**, **test** and **Octopus Deploy**.
- ✓ Worked with **Kubernetes** to automate deployment, scaling and management of web Containerized applications.
- ✓ Implemented automation for deployments by using **YAML scripts** for massive builds and releases
- ✓ Created development and test environments for different micro services by provisioning Kubernetes clusters on Azure using **Docker, Ansible,** and **Terraform.**
- ✓ Used **Azure Terraform** to deploy the **Azure infrastructure** necessary to create development, test, and production environments for a software development project.
- ✓ Create and publish **NuGet** packages and maintain the **NuGet** infrastructure that several teams use at build time
- ✓ Managed **Azure** Infrastructure **Azure SQL**, **Azure Storage**, **Azure AD** Licenses, **Virtual Machine Backup** and Recover from a Recovery Services **Vault** using **Azure PowerShell** and **Azure Portal.**
- ✓ Virtualized the servers using the **Docker** for the test environments and development environment and performed configuration automation using **Docker containers.**
- ✓ Configured and deployed the **NGINX** web server to host the web apps.
- ✓ Automate Continuous Integration builds, nightly builds, deployments and unit tests across different environments (DEV, QA, Training & Production)

Environment: Docker, Kubernetes, Ansible, Azure, ACS, Azure CLI, NuGet, Maven, NGINX, PowerShell, Terraform, Tomcat Server, GIT, Red hat Linux, YAML, Python.

DevOps Engineer **American Eagle Outfitters**

Pittsburgh, PA *11/2018 - 09/2020*

- ✓ Implemented AWS solutions using EC2, S3, EBS**,** configured Elastic Load Balancer with EC2 Auto scaling groups, IAM.

- ✓ Responsible for continuous integration and continuous delivery using **Jenkins, Maven and Chef.**
- ✓ Created scripts in Python which integrated with Amazon API to control instance operations.
- ✓ Wrote many python scripts and also implemented automated testing strategy for Robustness, Longevity/Load testing on the systems using Jenkins**.**
- ✓ Working on Inbound and Outbound services with automation. Deployed multiple resources simultaneously, using CloudFormation templates in **AWS**.
- ✓ Deploy and monitor scalable infrastructure on **Amazon web services** (AWS) & configuration management.
- ✓ Troubleshoot and resolved Build failures due to infrastructure issues reduced by 95% stabilizing the build process. Setup and executed process to code review system effectively.
- ✓ Developed and implemented Software Release Management strategies for various applications according to the agile process.
- ✓ Documented release metrics, software configuration process. Used Maven scripts to build the source code. Supported and helped to create Dynamic Views and Snapshot views for end users.
- ✓ Performed Branching, Tagging, and Release Activities on Version Control Tools: GIT
- ✓ Involved in setting up JIRA as defect tracking system and configured various workflows, customizations and plugins for JIRA bug/issue tracker.

Environment: GIT, AWS (EC2, VPC, ELB, S3, RDS, Cloud Trail and Route 53), Chef, Jenkins, Maven, JIRA, Agile, Linux.
